407. part of a garment & some skein of Braunchang. from Mr Brown

408. A white alabaster urn wt ivy berry fruit & branches upon its top & round the inscription, Dii manibus
Caii Cæsaris
Germanici
Augusti
Sacerdotis
optimæ de se meritæ
Lemnachy. Lib
Actor. XXXX. Gal

409. A cupid in Bronze from Rome antique from Mr Petticock

410. A Venus. Jd.

411 Cupid & Venus. J.

The Library Catalogues of Sir Hans Sloane: Their Authors, Organization, and Functions

Amy Blakeway

Sir Hans Sloane achieved many accolades in his own lifetime, including the influential and covetable positions of Royal Physician and President of the Royal Society. Sloane's rise from humble physician to pillar of eighteenth-century society is epitomized in the glamorous locations in Kensington and Chelsea which to this day bear his name, and those of his descendants. To people who have never heard of Sloane, the epithet '…of Sloane Square' immediately places him in the highest rank of social and historical importance. Despite significant achievements during his lifetime, perhaps Sloane's greatest legacy was posthumous: namely, as the man who accumulated the massive collections which formed the basis of the British Museum and, indirectly, of its children the Natural History Museum and the British Library. In spite of the importance of Sloane's collections, including his books, as recently as 1988 Margaret Nickson observed that bibliographers had hitherto

S. 5. Jacques Marquis, Oeuvres. Paris. 1662. in 8°

WOOKIEEPEDIA
THE STAR WARS WIKI

> "*Those Tuskens walk like men, but they're vicious, mindless monsters.*"
> —Cliegg Lars[src]

Tusken Raiders, less formally referred to as **Sand People** or simply as **Tuskens**, were a culture of nomadic, primitive sentients indigenous to Tatooine, where they were often hostile to local settlers.

“A library is not only a place of both order and chaos; it is also the realm of chance. Books, even after they have been given a shelf and a number, retain a mobility of their own.”

Alberto Manguel, *The Library at Night*, 2006

zyrcster says:
Wiilard Delmont Doremus, of Washington DC, was quite the inventor. His US Patent of 1889 for this mailbox can be seen here. Other patents on file for him are found here and here.

He had also been acquitted of a conspiracy charge In a Post Office Case of 1906 and was involved in a 1911 US District court case in regard to his cotton gin.

Tony Shaman says of his postbox, "In 1889 the U.S. Post Office Department ordered a new style letter box that had been designed by Willard D. Doremus. Three sizes of the design were produced. Unfortunately, they were poorly made and did not stand up well. Thieves were able to break into them to steal valuable mail. Nor did their poor construction keep out snow, sleet, or rain."

Mr. Doremus also created a postal canceling machine in use from 1899 through World War II in the US. Some examples of these cancellations are found midway through this page.

Search the collection

Search

Images only

Using the general search

To search across the whole database, just type a term into the main search box and click ‘Search’.

This general search is useful if using specific words regardless of where they might be recorded in the database. For searches where the context in which a word might be recorded in relation to an object, or where a term might be stored in a hierarchy such as Materials or Places, using the advanced search functions will produce more focussed results.

As with other search facilities, you can use an asterisk following a term to retrieve results including words beginning with, ending with, or containing the word entered. For example, searching for port* will find 'port', 'ports', porthole, etc.

More than one search term can be entered, as well as certain forms of punctuation and the operator 'OR' (which must be in upper-case) to broaden the results.

For example:

- elephant giraffe: will find all records with both words
- rim OR base: will find records containing either word
- "St Peter" will find records containing that exact phrase

This search can be used in combination with the Advanced Search

That’s the digital entry point to the British Museum.

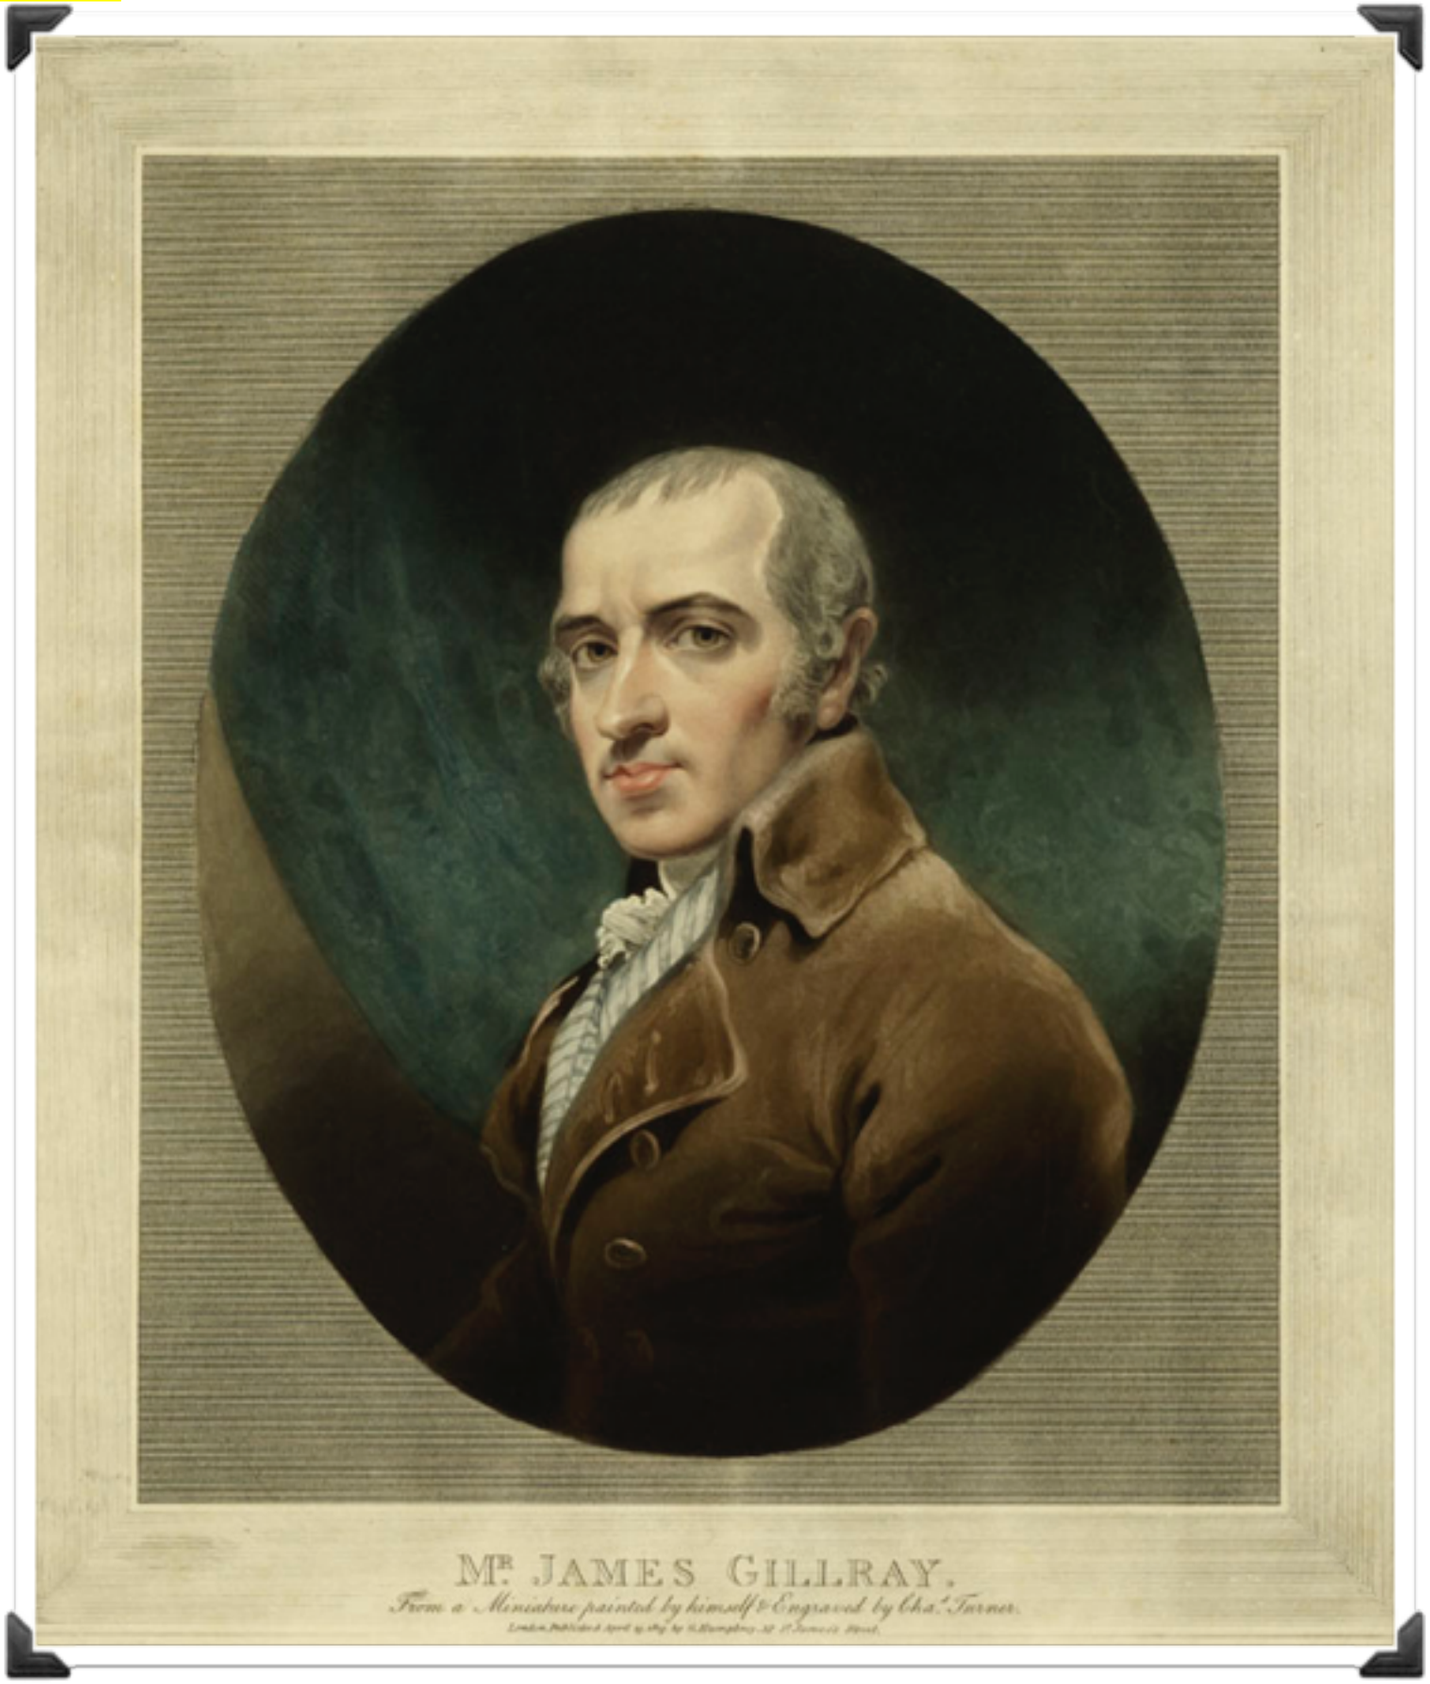
Week 3: Context



Week 3: Context

The GOUT.

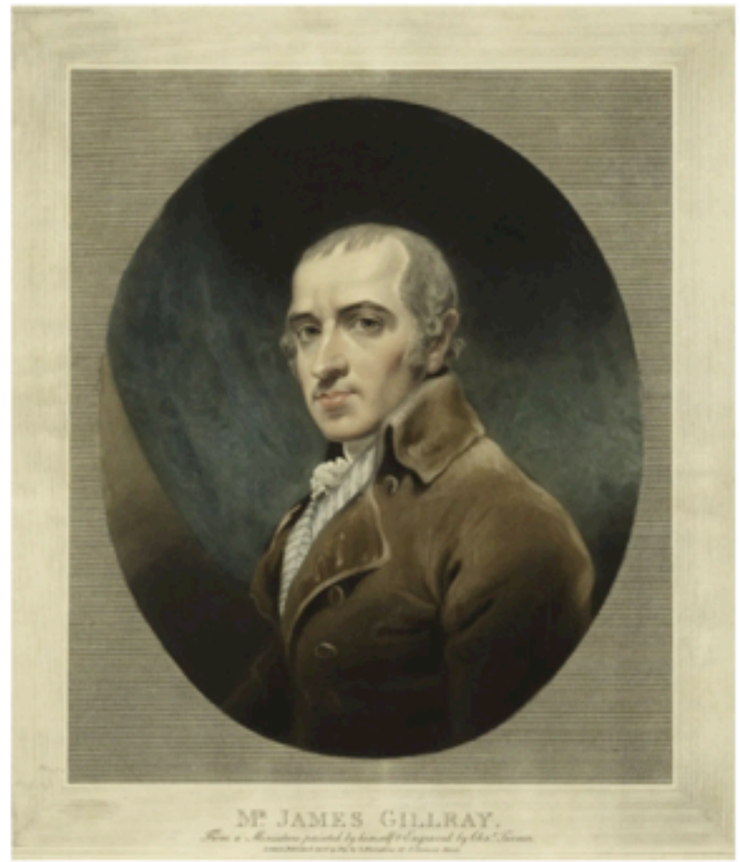
Pub.d May 14.th 1799. by H. Humphrey
27 St.James's Street.

Week 3: Context

James Gillray

James Gillray (13 August 1756 or 1757 – 1 June 1815) was an English caricaturist and printmaker famous for his etched political and social satires, mainly published between 1792 and 1810.

Wikipedia



Many of Gillray's prints depicted various forms of medical conditions and interventions, often lampooning quack doctors and painful 'cures'. That's largely why there are lots of his works at Wellcome.

A Selection of Gillray's Works

Henry Wellcome actively collected satires as rich iconographic sources of social comment on hot topics of their time - the medical profession, for example. There is scarce provenance information on many of them but it is likely that he acquired in groups at auction not individually as they might have been sold originally.

Week 3: Context

"This feels like I'm walking around a museum. At first i thought it was just going to be a list of stuff, until I saw the editorial… This feels new."

- Matt Webb, friendly visitor

Week 3: Context

Other identifiers for James Gillray

We've collected together all the IDs we could for for James Gillray in other people's databases and Authority Files.

Having these IDs means we can contruct links to other websites and catalogues, which may be helpful for finding more Gillrays, or perhaps for collecting (or verifying) metadata about Gillrays in the Wellcome Library collection.

Organisation	ID

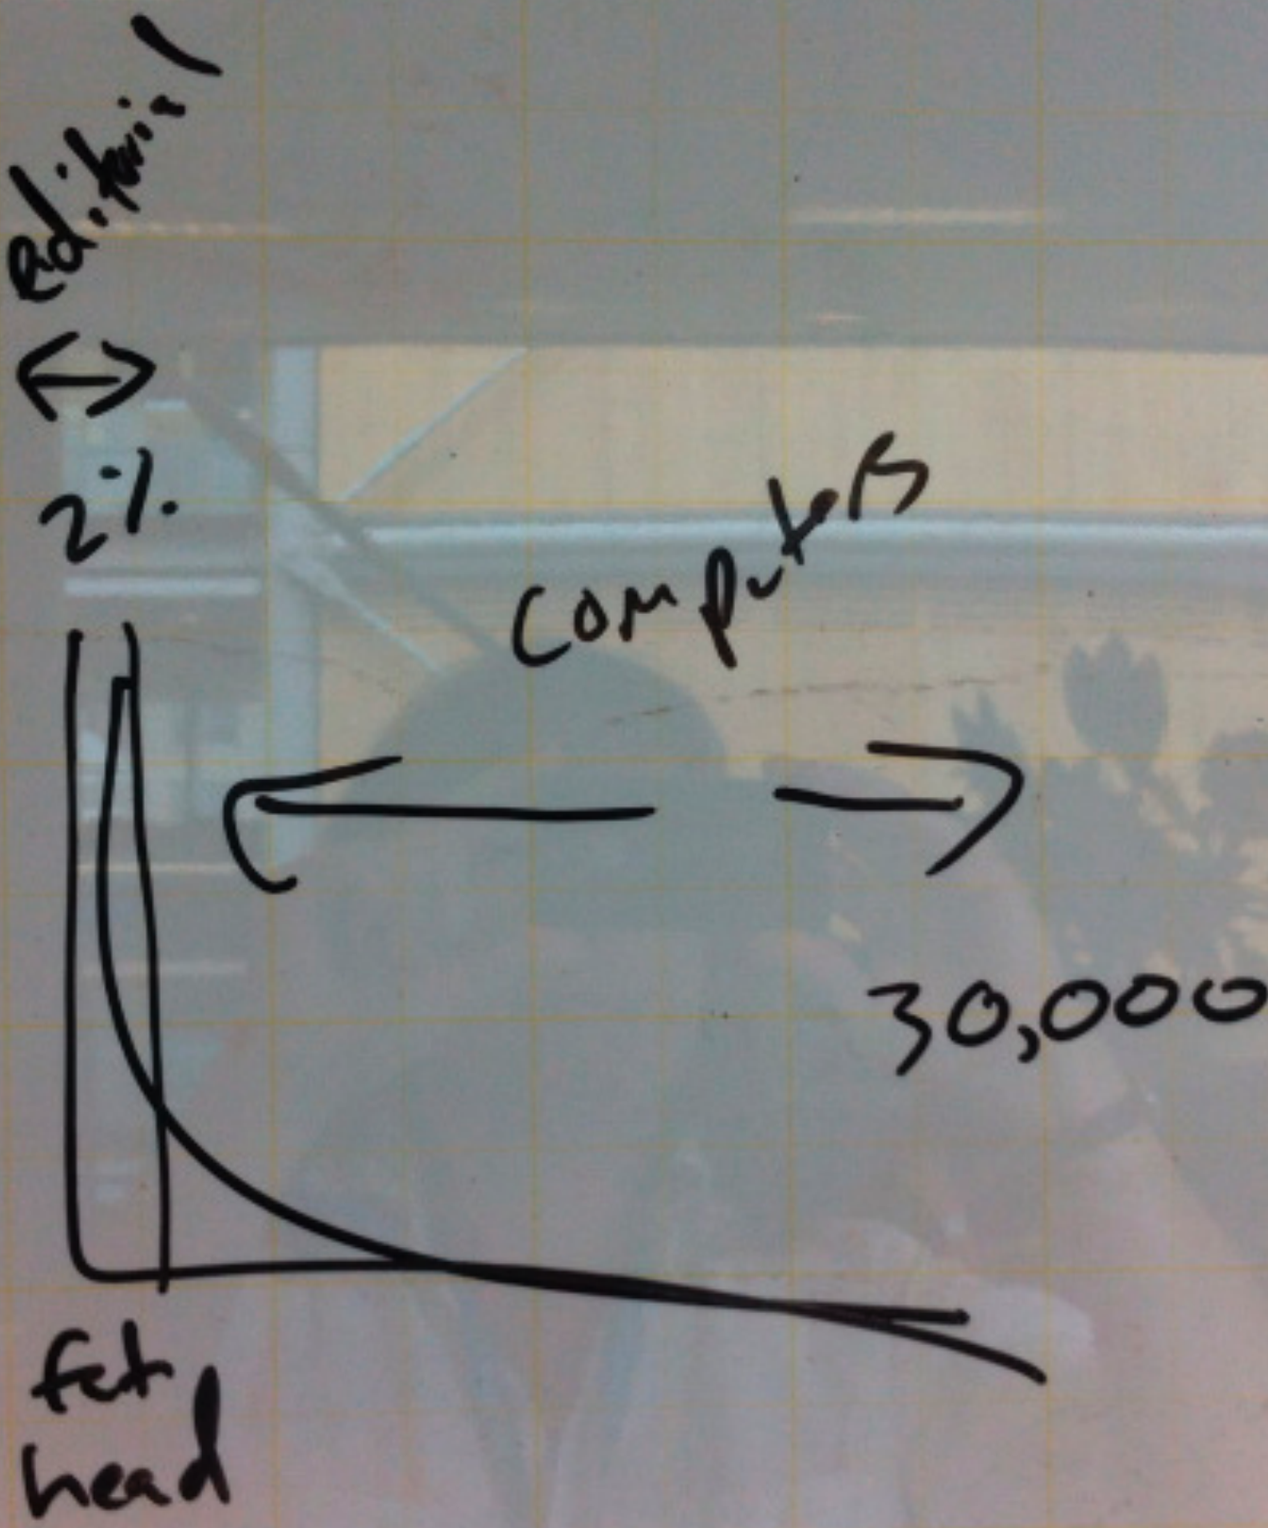
Week 3: Context



Week 4: Scalability

Welcome to Week 4!

Our work this week is about Scalability. We're hoping to take the work of the previous three weeks - scope, show the thing and context - and bundle it together in a fourth exploration. We're curious to see how we can enrich the MaRC across 962,000 records programmatically. Here are a few pointers to help you get started:

Interesting People

Galen, Marie Stopes, Henry S. Wellcome our Week 3 friend, James Gillray, Edward Jenner, Vesalius, Charles Darwin, Francis Crick, John Snow, Florence Nightingale, Melanie Klein

Curious Subjects

Cooking, Public health, Nurses, Cultural anthropology Anatomy, Plague, Apparent death, Psychiatric hospitals, Fetishism, Alchemy, Flowers, and Crutches

Daily Work Log

Day 1

- We've started building a list of People.
- Here's a subject page about Blood
- On hemorrhoids thing page

Tiny ontology, surgical updates

“*Make available*” is really different to “*actively connect*”

Jenny Holzer

You’re unique!

(Even though your collection may relate to general entities!)

Thanks!
