

# Semantic Web and Archives

Describing things and documenting actions

Oliver Schihin

State Archives of Basel-Stadt

([oliver.schihin@bs.ch](mailto:oliver.schihin@bs.ch))

# What we want

- Publish data from our AIS (database) as linked data
- To be open, linkable and to link to
  - Libraries
  - Government agencies
  - Digital humanities
- Limit to publicly accessible data (openness via data protection)

# What we publish

- Four different «business objects» (for now)
  - Units of description: Isad(G)-structured record tree
  - Descriptors: Internally used thesauri
  - Partner data: Government agencies, private persons and organisations
  - Delivery data: Information about delivery

# Vocabs, vocabs, vocabs

- How to describe all that?
  - PREMIS: very useful
  - RIC: unfinished since ...
  - xlsad(G)
  - FOAF
  - DC
  - Unfinished business
